Restriction to one of the following inventions is required under 35
 U.S.C. 121:

- I. Claims 1-4, drawn to a method for aluminum ash recycling, classified in class 423, subclass 579+.
- II. Claims 5-7, drawn to a method of making a ceramic filter, classified in class 264, subclass 44.

The inventions are distinct, each from the other because of the following reasons:

- 2. Inventions I and II are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions the aluminum oxide used in the group II claims need not come from the aluminum ash recycling method. The two methods of group I and II have different modes of operation and effect and are unrelated processes.
- 3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their

different classification, restriction for examination purposes as indicated is proper.

- 4. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.
- 5. Because these inventions are distinct for the reasons given above and the search required for any one Group is not required for the other Group, restriction for examination purposes as indicated is proper.
- 6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Stephen J. Lechert Jr. whose telephone number is 571-272-1203. The examiner can normally be reached on 9:30-6:00.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Michael P. Colaianni can be reached on 571-272-1196. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
